

# The Rapid IIoT Solution

*Simplify & Accelerate Your IIoT Transformation*

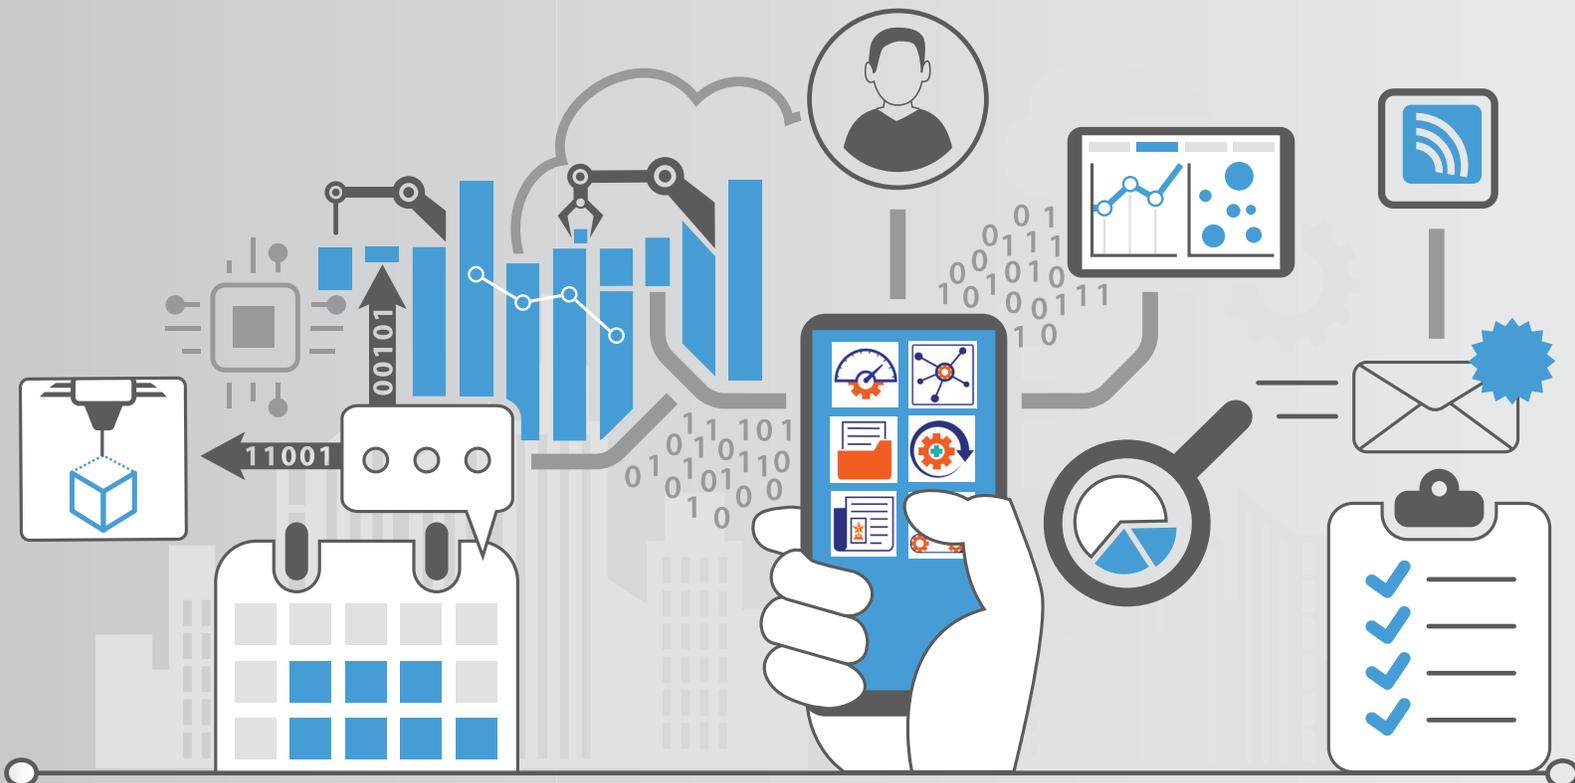

## Highlights:

- *Easy to implement.*
- *Reduce the time and effort of connecting your factory assets.*
- *Streamlined migration to paperless production.*
- *Subscription based. No software or hardware to buy.*

Manufacturers are excited about the benefits promised by the Industrial Internet of Things (IIoT), yet many are wary of the time and resources required for this new industrial revolution. Now you can simplify and accelerate deployment of shop floor connectivity, data collection and storage along with data visualization and analysis - the most important building blocks for successful IIoT projects - with the Rapid IIoT Solution from 42Q.

42Q's Rapid IIoT Solution provides a toolkit to connect to your IIoT-ready production environment, manage your manufacturing operations, and transform your factory data into actionable intelligence. With the Rapid IIoT Solution, you can take immediate steps that deliver both short-term advantages and long-term transformational value on your journey to IIoT.

## Connect, Collect, Analyze & Visualize Factory Data

## Rapid IIoT Solution Includes:

- **IIoT Shop Floor Connectivity:**  
*Connect your IIoT-ready factory assets to intelligent systems in the cloud.*
- **Data Storage:**  
*Collect data from connected factory equipment and prep for analysis and reporting.*
- **Statistical Process Control:**  
*SPC and end user analytics/ reporting for identifying trends in temperature, pressure, etc. within your factory equipment.*

## The Easiest Way to Begin Your IIoT Transformation

With the Rapid IIoT Solution, you can jump-start your IIoT transformation and begin to see advantages of IIoT projects immediately. Gain global visibility into your factory operations and access advanced analytics that provide insights into your operations that have been impossible to achieve until now.

The Rapid IIoT Solution is part of the 42Q Cloud platform: a complete, scalable cloud solution for managing global manufacturing operations.

## IIoT Module: Simplified Shop Floor Connectivity

The IIoT module simplifies and accelerates the capability to connect factory assets - machines, inspection systems, warehouse systems, etc. - to intelligent systems in the cloud. By connecting all of this critical manufacturing equipment to 42Q's intelligent management and analysis tools, the Rapid IIoT Solution enables executives and managers understand the root causes of differences in performance between individual machines, different lines, even work shifts.

## Business Intelligence: Your Manufacturing Questions, Answered

Also included in the Rapid IIoT Solution, the Business Intelligence module from 42Q provides real-time reports and alerts that enable manufacturing executives to see what's going on in their operations - right now. From dashboards to automated reports, 42Q Business Intelligence provides easily-digestible data visualizations that enable a plant manager or executive to make smart decisions based on real-time information.

## About 42Q

42Q is a leading provider of cloud MES solutions, implemented in over 60 manufacturing facilities. Our mission is to deliver scalable, flexible and easy to implement manufacturing solutions to our customers. Our management team has extensive experience with the architecture, development and implementation of advanced MES and manufacturing automation systems deployed across a broad range of vertical markets. 42Q is a business unit of Sanmina Corporation.
